TEXTILE WORLD

INDEX TO VOLUME 112
January–December, 1962

McGraw-Hill Publishing Co., Inc.
330 West 42nd Street, New York 36, New York

A

Air conditioning and cleaning (see also **Ventilation**)
- Air conditioning textile mills today – report — Dec. 42
- 4 case histories in mill air conditioning — Dec. 48
- 4-part mill story: modernizing to keep up with today's markets Pt 3 – Tops in air conditioning — Sept. 45
- Modernizing three ways – Carleton Woolen Mills, Inc. — Jan. 77
- Moving machines: key to modernizing at Lydia Cotton Mills — Jan. 72
- Top trends today . . . air conditioning — Jan. 55
- Updated all the way – modernization program at Avondale Mills — Jan. 67

American Association of Textile Chemists and Colorists (see **Associations**)

Associations
- AATCC makes headlines — Dec. 91
- Catawba Valley Hosiery Club – hosiery men air problems – and share their answers — Feb. 66
- Georgia Textile Operating Executives annual fall meeting – 7 tips on slashing, weaving — Nov. 64
- Textile Operating Executives of Georgia meeting – carding still packs 'em in — June 104

Automation
- Box sweeper cuts cleaning labor 30% (CC) — May 82
- Knitting without knitters — May 74
- Racks cut handling costs 50% (CC) — May 86

B

Beaming (see **Warp preparation and beaming**)

Belts, conveyor (see **Material handling**)

Bleaching (see also **Chemical treatment and finishing**)
- Acid-peroxide bleach reduces bleeding — May 92
- Acid-salt combination gives whiter whites — Dec. 77
- AATCC meeting – study of four variables in conventional bleaching systems — Dec. 94
- Chlorite-bleaching baths can cause degradation of cotton — Mar. 78
- Complete removal of cotton waxes isn't necessary for good absorbency — Oct. 101
- Continuous bleaching range (ESN) — Jan. 132
- Cotton bleaching today – report — July 220
- Deionizers: key to safe dilution of 70% H_2O_2 — Oct. 101
- Deposit brightener on substrates and you'll get good shade control — Sept. 80
- Discolored nylon goods cleaned — Aug. 57
- Don't overdo first-stage preparation of cotton goods going into peroxide bleaching — Oct. 101
- Finishing high-wet-modulus rayon-cotton blends — May 98
- Finishing without guesswork — Mar. 90
- Fluorescent whitening agents effectiveness — May 93
- Fresh sodium chlorite solutions have initial pH of 10.8 — Aug. 59
- Fumes, corrosion banned in chlorite bleaching — Oct. 99
- Germans develop new soluble optical bleach — Oct. 100
- Germans find insoluble acid esters will speed chlorite bleaching — Jan. 97
- Highly concentrated peroxide cuts bleaching-chemical costs — June 71
- Irradiated potassium chlorate useful as a bleaching agent — Mar. 78
- J-box operates at 420 YPM. (ESN) — June 136
- Know-how + the right site = success – Whittaker's wool scouring plant — May 108
- New way to bleach nonstop – Cranston Print Works — Jan. 109
- Optical bleach works on cotton, nylon — July 216
- Optical brighteners will resist bleaching — June 73
- Optical brighteners work well with resins — Dec. 77
- Oxalic acid in removing iron stains in nylon fabrics — Dec. 77
- Potassium permanganate has selective bleaching action on organic impurities in cellulosic material — Aug. 59
- Saving on bulk deliveries — July 278
- Single J-box speeds bleaching — Aug. 57
- Sodium chlorite bleaching cuts process time (ESN) — Aug. 116
- Spray washer removes caustic at 30 ypm. (ESN) — July 192
- Steam speeds optical brightener absorption — July 215
- Stop motion eliminates drying damage (CC) — May 86
- Tips on using scroll rolls — July 258
- Troubleshooting those bleaching problems — July 244
- Two-step bleaching process uses chlorite-permanganate base — July 215

Blending (see **Opening, picking and blending**)

Braiding
- Braider (ESN) — May 146

Building construction (see also **Maintenance, buildings and grounds**)
- Building for smoother flow – Indian Head Mills, Franklin Process Div. addition — May 111
- Drexel Knitting Mills – building for better production control — Feb. 46
- How building walls transmit heat — July 114
- How a small double-knit mill got into production – fast, Shannon Limited Inc. — Oct. 83
- Inman Mills – 60 years old . . . and still growing
- New plant: built-in efficiency — Sept. 68
- Know-how + the right site = success – Whittaker's wool scouring plant — May 108
- Meeting the big push in tufting today – Cabin Crafts Inc. — May 56
- Modernizing three ways – Carleton Woolen Mills, Inc. — Jan. 77
- This old multistory mill now made new – Kendall Co.'s Watereе plant — June 54

C

Calculations, mathematical (see **Formulas and Calculations**)
Cans, coiler (see **Material handling**)
Capacity, industry (see **Economics, textile-industry**)
Capital spending (see **Economics, textile-industry; Management**)

Carding
- Build a new mill – or buy an old one? — Mar. 68
- Card chain (ESN) — May 148
- Card conversion (ESN) — Dec. 128
- Card drive (ESN) — June 138
- Card drive ups production 6% (CC) — May 82
- Card output goes to 60 pounds per hour (ESN) — Nov. 130
- Card set uses latest design advances (ESN) — Apr. 123
- Card starter (ESN) — Feb. 142
- Card stop motion (ESN) — Dec. 130
- Card stop motion cuts sliver waste (ESN) — June 135
- Carding – what's new, what's ahead — Apr. 43
  1. Multicylinder carding – 'way out front today — Apr. 44
  2. Air carding – coming up fast — Apr. 48
  3. Burr crushing – quality booster — Apr. 51
  4. New carding aids – $ – savers all — Apr. 53
- Coiler boosts carding output 270% (CC) — Nov. 108
- Comb improves web release (ESN) — Feb. 118
- Compact and versatile card unit (ESN) — May 141
- Cotton Research Clinic – carding steals the spotlight — Feb. 60
- Device costing 25¢ saves over $585 (CC) — Feb. 110
- Doffer comb (ESN) — Nov. 134
- Draft-gear table for cards — July 56
- Dual flats boost cotton-card production 50% (ESN) — Sept. 134
- Flat-top coiler (ESN) Sept. 156, — Nov. 150
- Gage for setting barrow production change-gear (ESN) — Sept. 140
- Georgia TOE meeting – Carding still packs 'em in — June 104
- How to determine production of sliver by cards — July 52
- Modernizing three ways – Carleton Woolen Mills, Inc. — Jan. 77
- Moving machines: key to modernizing at Lydia Cotton Mills — Jan. 72
- New card uses air transfer (ESN) — Nov. 127
- Non-stop modernizing: combing paces the gains — Nov. 60
- Old multistory mill now made new – Kendall Co.'s Watereе plant — June 54
- Resonant doffer comb breaks speed barrier (ESN) — Sept. 134
- Roller-top card (ESN) — Oct. 218
- Roller-top card handles long staple fiber (ESN) — Feb. 115
- Roller top card ups production (ESN) — Nov. 130
- Sliver-can capacity upped 10% (CC) — Nov. 106
- Spinning system uses cotton waste (ESN) — Jan. 131
- Stop motion means no more singlings (CC) — Aug. 86
- Stretchless belt – no more downtime (CC) — Sept. 114
- Top trends today . . . carding, drawing, combing, roving — Jan. 50
- Traverse grinder (ESN) — Jan. 148
- Updated all the way – modernization program at Avondale Mills — Jan. 67
- Updating for better yarn – Jordan Mills — Jan. 81

Carpets
- Dyeing big tufted carpets — Oct. 106
- New way to dye carpets open-width — June 78
- Steel cloth keeps carpets in shape (FYF) — July 181
- Two carpets make summer debut (FYF) — July 183
- Texturized carpet, Zenith (FYF) — May 135
- What keeps a top-notch carpet company at the top? – Roxbury Southern Mills, Inc. — Nov. 48
- Yarn made just for carpets (FYF) — June 125

Chemical treatment and finishing (see also **Bleaching; Coated fabrics; Dyeing; Laminated fabrics**)
- Acid-peroxide bleach reduces bleeding — May 92
- Acid-salt combination gives whiter whites — Dec. 77
- Acrylic resin backings: how to apply them, how to overcome their drawbacks — Nov. 79
- AATCC makes headlines — Dec. 91
  - Study of oil – and water-repellent surfaces — Dec. 92
  - Some factors influencing odor development in resin-finished goods — Dec. 92
  - Olney winner — Dec. 94
  - Reports from overseas — Dec. 94
  - New class of inorganic fungicides — Dec. 94
  - THPC compounds — Dec. 94
  - What causes yellowing of cottons — Dec. 94
- Amino aftertreatment prevents dye markoff — Feb. 81
- Ammonium carboxymethyl cellulose, highly etherified, has excellent print-paste properties — Mar. 78
- Ammonium salts level acid dyeing on nylons — July 215
- Antistatic agent (ESN) — Oct. 208
- Antistatic agents may increase soiling of polyester-fiber fabrics — May 93
- Aryl sulfones show promise as carriers — Nov. 73
- Batcher handles all types of cloth (ESN) — Mar. 136
- Batchers and expanders (ESN) — Nov 132
- Bates Mfg. Co., New England, keeps competitive with nonstop modernization — Mar. 52
- Best way to use cationic softeners — July 242
- Bonded pigments give good fastness to blends of cotton and polyesters — Oct 100
- Bow-bar, adjustable (ESN) — July 200
- Brine system saves $2,500 a year (CC) — Dec. 104
- British decal system prints knitted fabrics — Feb. 80
- British develop new aftertreatment that improves reactive dyeings — July 217
- British develop reactive finishes that improve nylon properties — Nov 74
- British find new way to cut wool shrinkage — Feb. 79
- British find way to get plissé on man-mades — Mar. 77
- British say fluidized bed process will improve naphthol dyeings — Apr. 69
- Buffer will reduce tensile strength losses in resin-treated cotton — Jan. 97
- Building for smoother flow – Indian Head Mills, Franklin Process Div. addition — May 111
- Burlap – moving up fast with burlap at Jonell Corp. — Apr. 89
- Calender uses swimming roll (ESN) — Dec. 124
- Cationic retarding agents are water-soluble amines — Feb. 81
- Checking particle size of vat pigments — July 262
- Chlorine process shrinkproofs wool — June 71
- Combined methods print polyester-cotton blends — Aug. 58
- Common salts will cut carrier costs — Apr. 69
- Continuous process chlorinates wool — Apr. 69
- Controlling color in resin-finished goods — June 96
- Controlling pH of a wool dyebath — July 258
- Cotton batting with 85 to 90% immediate recovery from compression — June 73
- Cotton bleaching today – report — July 220
- Cotton finishing: where it stands, and what's ahead — Feb. 86
- Cotton stretch fabrics are big topic at CFC — Nov. 89
- Crease resistance for spun-rayon fabrics — July 282
- Crease resistance sparks Cotton Research meeting — June 71
- Crosslinker for cellulosic fibers is durable and chlorineproof — July 216
- Cyanuric acid treatment gives good rotproofing — Feb. 80
- Decatizer is continuous (ESN) — Apr. 124
- Delayed crosslinking key to two-step finish — Dec. 75
- Deposit brightener on substrates and you'll get good shade control — Sept. 80
- Diazo compounds give bleach-fast sulfur colors — Sept. 79
- Difference in specific volume of fiber makes difference in dyeability — Sept. 81
- Dipper racks save $2,000 a year (CC) — Sept. 118
- Discolored nylon goods cleaned — Aug. 57
- Disperse dyes for polypropylene — June 73
- Do-it-yourself chemical saves 20% (CC) — Sept. 114
- Double-duty continuous weft straightener (ESN) — May 142
- Drapery fabrics made of polyester fibers resist sunlight better when made of high-denier yarns — Dec. 77
- Dryer saves 1½ hours in shade checks (CC) — Dec. 106
- Dyebeck control (ESN) — Dec. 136
- Dyeing big tufted carpets — Oct. 106
- Dyeing, finishing possible in one run — Nov. 75
- Easy-to-make reactants look promising for wash-wear finishes — June 72
- Effect of heat on dyes must be considered in producing molded textiles — Aug. 59
- Epoxy compounds promise good wash-wear finishes — May 91
- Equilibrium water content of commonly used humectants — July 266
- Everyday resins will improve THPC flameproofers for rayons — June 72
- Experts give views on dye migration — May 91
- Fabric handling modernized – Huyck Felt Co. — Jan. 83
- Fiberglass permanently crimped (FYF) — Feb. 113
- Finishing high-wet-modulus rayon-cotton blends — May 98
- Finishing stretch fabrics — Aug. 63
- Finishing without guesswork — Mar. 90
- Fishy odors in resin-finished goods caused by formic acid or formates — July 217
- Fixed-bow expander (ESN) — Jan. 135
- Flameproofers are durable, self-attaching — July 217
- Flocking – giving fabrics a new look — June 87
- Fluorescent materials check coat thickness — Sept. 79
- Four key points in modernizing – Erwin Mills' Cooleemee Bleachery & Finishing Works — Jan. 102
- Gel particles in viscose rayon solutions — Oct. 101
- German convertible emulsifiers up water repellents' efficiency — Dec. 76
- German reducing agents give better resists on leuco-vat grounds — Nov. 74
- Germans find insoluble acid esters will speed chlorite bleaching — Jan. 97
- Glauber's salt may be used to replace up to one-third of more expensive retarding agents in dyeing acrylic fibers — Feb. 81
- Green naphthol for polyester fibers — May 92
- Guider gives extreme accuracy (ESN) — June 136
- Handling cuts finishing costs – Synthetics Finishing Co. — Jan. 79
- Heat alone drives dyes into polyolefin fibers — Nov. 73
- Heat treatment makes bacteriostats durable — Oct. 100
- Heating polypropylene ups crease resistance — Sept. 80
- Heatsetting on nylon effects revealed — Mar. 75
- Help in converting data — July 286
- Highly concentrated peroxide cuts bleaching-chemical costs — June 71
- Hot buffered bath cuts static pickup — Sept. 79
- How a small double-knit mill got into production – fast — Oct. 83
- How you can assess nonionic surfactants — July 270
- Improved carriers are based on phenylphenols — May 92
- Insoluble azoics dye polyester fiber well — Feb. 81
- Isocyanate adducts improve washfastness — May 93
- Japanese find organic acids put in, take out pleats in wash-wear goods — Aug. 59
- Key to wash-wear dye method: work backwards — Feb. 79
- Keys to dyeable polypropylene – polymer grafts, resin additivies — Mar. 76
- Know-how + the right site = success – Whittaker's wool scouring plant — May 108
- Liquid desizer (ESN) — Sept. 136
- Low BOD starch derivative promises less pollution — Jan. 95

(CC) Cost Cutters. (Ed) Editorial. (ESN) Equipment & Supply News. (FYF) Fibers, Yarns, and Fabrics.

Low-stability foams improve imitation suedes — Nov. 74
Lubrication system – not a can bearing lost in a year (CC) — Feb. 110
Melamine-formaldehyde syrups prevented from "slushing out" — June 73
Mercerizer controls will boost quality (ESN) — Dec. 122
Metal detector (ESN) — Aug. 118
Mix melamines, triazinones and get the best of each — Mar. 77
Modified nylon fabrics are stiffer, dye easily — May 92
Modified reactive dyes stable in print pastes — June 72
Monoethanolamine bisulfite in milling woolens — Sept. 81
Multi-purpose finish signals breakthrough in dyeing-finishing — Mar. 75
Napped cloth output up 150% (CC) — June 110
Napper runs 26 ypm. on knit goods (ESN) — Mar. 134
New assistant improves phthalocyanine dyeings — June 73
New compounds foil ultraviolet rays — June 72
New plant spells new efficiency for John Boyle & Co. — Sept. 85
New 'repellency retainers' boost durability of water repellents — Aug. 57
New resin cuts problems of chlorine and fading — Oct. 99
New treatments change fiber characteristics — Aug. 58
New wash-wear finish rates high – is now in commercial use — Dec. 75
New waxy compound shows promise as durable softener for all fibers — Dec. 76
New way to bleach nonstop – Cranston Print Works — Jan. 109
New way to dye carpets open-width — June 78
New wet process means new uses for resins — Dec. 75
No more of those broken filaments in finishing — Apr. 78
No-shrink knits (FYF) — Mar. 117
Nonstop decatizing for knit goods (ESN) — Mar. 132
Nylon barre problem solved — Sept. 79
Nylon made less translucent with new finish — Jan. 95
Oil-in-water emulsion dyes polyolefin fibers — Sept. 80
Oil-modified resins protect glass fibers — Mar. 76
Old aminization process reborn to produce wash-and-wear finishes — Oct. 101
Old, spirit-soluble types of dyes can be used to dye polyester fibers — Feb. 81
Omitting the afterwash on resin-finished goods — Sept. 81
100 dyeing processes suggested for dyeing polypropylene — Aug. 59
One machine straightens all fabrics (ESN) — Feb. 115
One test separates, identifies all acrylic fibers used today — Aug. 59
Open-width scouring range (ESN) — Oct. 208
Open-width tension unit (ESN) — Feb. 120
Optical brighteners will resist bleaching — June 73
Organic isocyanates are new key to better washfastness on dyed cottons — Sept. 80
Organotins look good as bacteriostats — Jan. 95
Oxalic acid in removing iron stains in nylon fabrics — Dec. 77
Phenyl salicylate effective in stabilizing cellulose acetate from effects of sunlight — July 217
Phthalocyanines make discharging easy — May 92
Polyethylene emulsions as self-finishes — June 73
Polyethylene film, used to stiffen collar and cuff components in dress wear — July 217
Polyethylene granules — Apr. 71
Polyglycols prevent streaky dyeing — Apr. 69
Polypropylene dyeing? Try X-ray grafts — July 215
Polypropylene fibers treated with chlorine, bromine, fluorine or iodine can be dyed easily — Feb. 82
PVA saturated with alcohol before wetting will dissolve easily — Mar. 78
Presensitized woolens for permanent creases and pleats — Apr. 69
Pressurized paddle machine. (ESN) — Sept. 136
Pretreatment speeds dyeing of hard-to-dye fibers — May 91
Prevent discoloration in acrylic fibers caused by prolonged heat treatment — Nov. 75
Producing permanent creases – U.S. patent — Nov. 75
Radiation grafting aids polypropylene dyeing — Feb. 81
Range speeds tape finishing (ESN) — Feb. 116
Rayon treated with acid catalyst without formaldehyde absorbs much less water than untreated fiber — Jan. 97
Reactive dyes may signal breakthrough in fastness to bleach — Aug. 58
Resin bath additives cut chlorine retention — Oct. 101
Resin curing made fast and sure (CC) — Feb. 109
Resin-improved cotton battings may regain auto, furniture markets — Nov. 73
Resin mix gives good wash-wear, overcomes chlorine retention — Aug. 58
Resin pretreatment will stabilize rayon — June 72
Resins resist mildew, have low chlorine susceptibility — Jan. 95
Retarders help level acrylic dyeings — Mar. 75
Retarders lengthen silicone bath life — Mar. 77
Right dyeing assistant means new dyes for wool — Aug. 57
Rope saturator (ESN) — Sept. 150
Savagraph, improved printing process cuts costs 25 to 35% — Feb. 79
Shear device cools spiral cutting blades (ESN) — Dec. 136
Shearing range for cotton goods (ESN) Sept.136, — Nov. 152
Shrinkproof knit goods (ESN) — Oct. 208
Silicone pretreatment improves wash-wear tear, tensile strength — Nov. 75
Simple metabisulfite treatment kills fabric's resin-based odors — July 216
Simple modifying treatment improves acrylic fiber dyeability — Apr. 70
Single J-box speeds bleaching — Aug. 57
6 tips on today's resins — Apr. 83
Slat expander (ESN) — Dec. 145
Softener effects survive laundering — Apr. 70
Solvent system dyes polypropylene black — Aug. 58
Spray saves 1¢ a dozen on socks (CC) — Oct. 130
Spray system to dye your carpets — Feb. 80
Stability to chlorine laundering of resin finishes affected by long storage — Aug. 59
Stabilize polyolefin fiber to action of light — Dec. 77
Stack selvage eliminator (ESN) — Jan. 143
Starch-dye combination gives soil resistance — Dec. 76
Steam soaper cuts process cost (ESN) — Jan. 132
Steam speeds optical brightener absorption — July 215
Stop motion eliminates drying damage (CC) — May 86
Stretch recorder (ESN) — Feb. 124
Sulfamic acid halves time needed for wool dyeing — May 93
Sulfonium compounds improve washfastness — Oct. 101
Summer weight materials (FYF) — Jan. 127
Supercontraction – it may open new areas of development in wool — Apr. 71
Surface treatment for glass fibers improves hand, makes them dyeable — Feb. 80
Swiss develop method to get two-tone prints with reactive dyes — Mar. 77
Swiss lab develops one-bath process to dye wool-cotton blends — Feb. 81
Swiss lab finds resin-dye combination improves washfastness — Jan. 96
Swiss say amine treatment gives wet crease resistance to rayons — June 73
Swiss solvent fixation method speeds and levels wool dyeing — Nov. 75
Tankage and pumping system for bichromates (CC) — Jan. 121
Tension indicator (ESN) — Jan. 143
Tenter clip (ESN) — Dec. 134
Tenter frame production up 20% (CC) — Jan. 120
Thermosol dyeing method – textile chemists get latest tips — Oct. 99
Thiourea dioxide won't form scum on acid leuco-vat dispersions — Feb. 81
THPC-type flameproofers mean less strength loss — Mar. 75
3 short cuts in dyeing man-made fiber blacks — Sept. 95
Tips on maintaining your range drives — Aug. 46
Tips on using dye padders — July 259
Tips on using scroll rolls — July 258
Top trends today...dyeing and finishing — Jan. 52
Troubleshooting those bleaching problems — July 244
Two-pronged action improves washfastness — Sept. 81
Two-step bleaching process uses chlorite-permanganate base — July 215
Two-step process gives durable flame-proofing — Jan. 95
Ultrasonics – latest news in nylon hosiery finishing — Feb. 79
Unmechanized printer stays competitive — Aug. 70
Varying pH will improve reactive-dye prints — Jan. 97
Vat dyeing today Pt 10 Feb. 98, Pt 11 — Mar. 99
Vigoureux printing improved with new formula — Feb. 80
Wash-wear finish is cellulose reactant — Sept. 81
Wash-wear not overlooked at CFC — Nov. 90
Washer uses punch-card control (ESN) — June 138
Wool dyes offer reactive-dye benefits — Oct. 99
Wool shrinkage: 3 ways to control it — June 91
Wool-wash system boosts lanolin yield — July 215
Wurlan – new name for interfacial polymerization process — June 73

Cleaners, textile-equipment
Air filter (ESN) — May 148
Air stations cut damage costs 50% (CC) — Nov. 108
Cleaners save $107 per roving frame (CC) — Oct. 132
Cleaning cotton – Georgia TOE meeting — June 105
Collection system means 50% fewer spinners (CC) — Apr. 98
Floor-and-frame cleaner (ESN) — Dec. 132
Loom cleaner (ESN) — Dec. 136
Loom cleaning – giant step — Feb. 54
New concept in mill cleaning (ESN) — Dec. 124
Suction cleaner (ESN) — Apr. 138
Taming wild yarn at the spooler (CC) — June 110
Traveling cleaners cut labor 50% (CC) — May 82
Vacuum loom cleaner (ESN) — Dec. 134

Cleaning, plant-maintenance (see **Maintenance, buildings and grounds**)

Cloth room
Cloth-inspection machine (ESN) — Dec. 140
Cloth-room equipment (ESN) — Dec. 142
How a small double-knit mill got into production – fast — Oct. 83
How to set up a cloth-grading system — July 286
Napped cloth output up 150% (CC) — June 110
Old stacker now bales, saves $1,550 (CC) — Nov. 104
Platform cuts packing labor 67% (CC) — Dec. 104
Sewing trough saves $2,000 a year (CC) — Dec. 108
Smooth way to handle fabric – South Carolina State Ports Authority — Mar. 60

Coated fabrics (see also **Chemical treatment and finishing**)
Acrylic resin backings: how to apply them, how to overcome their drawbacks — Nov. 79
All-in-one stretcher-blanket (FYF) — Sept. 131
AATCC meeting – insulating values of fabrics, foams, and laminates — Dec. 92
Breathable coating (FYF) — Jan. 127
British powder penetrates fibers in coatings — Jan. 89
Britisher disputes coating tear-strength theory — Jan. 89
Extrusion coating – brand-new way to coat fabrics — Feb. 50
Felt to metal bond (FYF) — Nov. 119
Fluorescent materials check coat thickness — Sept. 79
Lighter-weight protective suit (FYF) — July 181
Low-stability foams improve imitation suedes — Nov. 74
Neoprene-coated fabric rain hat (FYF) — Sept. 131
New canopy uses coated fabrics (FYF) — Aug. 107
New way to bond foam (FYF) — Apr. 109
Nylon windproofed (FYF) — Dec. 113
Ship-board tents (FYF) — Oct. 141
Upholstery fabric gets soft touch (FYF) — July 183
Urethane foams cast continuously on various substrates — Apr. 71
Vinyl furniture covering (FYF) — Sept. 131

Combing and lap winding
Air conditioning textile mills today – report — Dec. 42
4 case histories in mill air conditioning — Dec. 48
Bates Mfg. Co., New England, keeps competitive with nonstop modernization — Mar. 52
Comber cuts fly and ends-down (ESN) — Mar. 131
Cotton comb (ESN) — Dec. 141
Creel cuts lap winder waste 30% (CC) — Dec. 106
Easy way to cut reducing waste 5% (CC) — Nov. 108
Figuring output on a model J comber — July 64
First report on new comber changeover – Russell Mfg. Co. — Jan. 79
How much production you'll get from a 10½-in. lap winder at 100% efficiency, 20 slivers per lap — July 60
Laps doffed automatically on sliver lapper (ESN) — Sept. 133
Non-stop modernizing: combing paces the gains — Nov. 60
Sliver-can capacity upped 10% (CC) — Nov. 106
Top trends today...carding, drawing, combing, roving — Jan. 50

Competition (see **Markets and marketing**)

Controls, electrical (see **Electrical equipment**)

Conveyors (see **Material handling**)

Cost Cutters Jan. 120, Feb. 108, Mar. 106, Apr. 102, May 82, June 110, Aug. 84, Sept. 114, Oct. 130, Nov. 104 — Dec. 104

Costs, indirect
Standardizing electrical equipment – foolproof way to cut costs, slash parts inventory — June 58

Costs, labor
Walkie-talkie radio cuts labor 50% (CC) — Apr. 98

Cotton processing (see process headings such as **Spinning, Chemical treatment and finishing, etc.**)

Cotton-crop analysis
How 1961 cotton stacks up — Mar. 62
Southeast cotton: better — Dec. 66
Texas cotton – first report — Nov. 47
Two reports on 1961 cotton – Mid-South; West Texas — Feb. 53

Cranes (see **Material handling**)

D

Data handling
Building for better production control – Drexel Knitting Mills — Feb. 46
Data handling: key to hosiery mill success — Apr. 54
Top trends today...data processing — Jan. 56

Design, fabric (see **Fabric design**)

Doffing
Mechanical doffer cuts doffing time 50% (ESN) Oct. 207 — Nov. 127
Sliver lapper doffs automatically (ESN) — Nov. 130

Drawing (see **Roving and drawing**)

Drives, electrical (see **Electrical equipment**)

Drying and drying equipment
Automatic lid-locker eliminates eye bolts (ESN) — Aug. 113
Beta gage monitors tricot fabric yield — Apr. 71
Breaking the drying bottleneck — Oct. 110
Stop motion eliminates drying damage (CC) — May 86
Tenter frame production up 20% (CC) — Jan. 120
3-step way to finish tricot — Oct. 113

Dyeing (see also **Chemical treatment and finishing**)
Acrylic fiber features dyeing versatility — Jan. 96
Additives may be answer to polypropylene dyeing — Jan. 96
AATCC makes headlines — Dec. 91
Getting more from dyes — Dec. 94
Ammonium salts level acid dyeing on nylons — July 215
Anionic compound gives level wool dyeings — Dec. 76
Aryl sulfones show promise as carriers — Nov. 73
Assistant levels out basic dyes on acrylics — July 217
Assistant protects reactive-dye reduction — Nov. 73
Bonded pigments give good fastness to blends of cotton and polyesters — Oct. 100
Breaking the drying bottleneck — Oct. 110
Brine system saves $2,500 a year (CC) — Dec. 104
British develop new aftertreatment that improves reactive dyeings — July 217
British say fluidized bed process will improve naphthol dyeings — Apr. 69
Building for smoother flow – Indian Head Mills, Frankling Process Div. addition — May 111
Burlap – moving up fast with burlap at Joneil Corp. — Apr. 89
Carpets – dyeing big tufted carpets — Oct. 106
Carriers speed triacetate dyeing — Nov. 74
Checking particle size of vat pigments — July 262
Chlorinated hydrocarbons, tetralin reduce crocking of naphthols — Sept. 81
Common salts will cut carrier costs — Apr. 69
Controlling color in resin-finished goods — June 96
Controlling pH of a wool dyebath — July 258
Converted reactives dye polyester fibers — Dec. 77
Copolymer solution will improve crockfastness — Dec. 76
Czechs develop pressure system to dye wool-cotton blends quickly — Dec. 77
Disperse dyes for polypropylene — June 73
Dryer saves 1½ hours in shade checks (CC) — Dec. 106
Dye assistant levels polyester yarn dyeings — Nov. 74
Dye wool yarn in oil to cut processing costs — Jan. 96
Dyeable-type polypropylene fiber (FYF) — Mar. 117
Dyeing, finishing possible in one run — Nov. 75
Dyeing machine design saves floor space (ESN) — Apr. 123

Czech dual twister improves uniformity, ups speed ... Dec. 71
Double-deck twister (ESN) ... Feb. 118
Double twister makes 10 lb. yarn package (ESN) ... May 141
False twister (ESN) ... Dec. 130
Figuring ply yarn numbers ... July 104
Germans use comb to clean yarn at winding ... June 107
High-speed winder (ESN) ... Dec. 132
How to figure spooler yards per minute – fast ... July 108
Knot breaker saves $15,000 (CC) ... Jan. 120
Knot counter cuts standards to 1/800 (CC) ... Dec. 108
Make-'em-yourself disks save 40% (CC) ... Mar. 110
Moving machines: key to modernizing at Lydia Cotton Mills ... Jan. 72
New drive cuts winder downtime 2% (CC) ... Sept. 116
New winder has 20 independent heads (ESN) ... Dec. 122
Non-stop modernizing: combing paces the gains ... Nov. 60
Now you can wind on tubes (ESN) ... Aug. 114
Nylon stretch-yarn fabrics: why they're big today; how you can weave them ... Oct. 70
Old multistory mill now made new – Kendall Co.'s Wateree plant ... June 54
Print-cloth mill ... July 104
Quills identified with colored chalk (CC) ... Aug. 84
Radial winder (ESN) ... Mar. 136
Radial winder is fully automatic (ESN) ... Nov. 128
Revolving delivery bobbin ups twister output in Hungary ... Sept. 123
Rubber-covering machine (ESN) ... Nov. 132
Selecting twisters for three kinds of yarn ... July 104
Shuttle bobbin (ESN) ... Aug. 118
Stranding machine (ESN) ... Nov. 134
Taming wild yarn at the spooler (CC) ... June 110
Tension-control unit (ESN) ... June 140
Top trends today...in manufacturing ... Jan. 48
Twister (ESN) ... Nov. 159
Twister adds speed and economy (ESN) ... Jan. 132
Twister increases versatility (ESN) ... June 138
Twister is big, but runs fast (ESN) ... Aug. 114
Two-for-one twister (ESN) ... June 138
Two-for-one twister makes 9½-in.-dia. package (ESN) ... Oct. 208
Two-for-one twister needs no pre-winding (ESN) ... Nov. 128
Updated all the way – modernization program at Avondale Mills ... Jan. 67
Uptwister conversion kit (ESN) ... Feb. 120
Waxer cuts threading time 25% (CC) ... Oct. 132
Winder is easy to operate (ESN) ... Mar. 132
Winder makes 35-lb. precision-wound package (ESN) ... July 191
Winding unit cuts handling costs 50% (CC) ... Nov. 106
Yarn clearer (ESN) ... Nov. 159

Wool processing (see process headings such as **Weaving, Dyeing etc.**)

Work flow (see **Layout, plant**)

Work loads (see **Labor efficiency; Industrial engineering**)

Y

Yarns, manufacturing of
Bulk yarns evaluated (FYF) ... Mar. 117
Bulking process for texturing (FYF) ... Feb. 113
Changeovers up drafting output 250% (CC) ... Sept. 116
Cone winder is automatic (ESN) ... Mar. 131
False twister – fastest yet (ESN) ... Feb. 116
4-part mill story: modernizing to keep up with today's markets ... Sept. 40
Inman mills – 60 years old...and still growing
Using the best in equipment ... Sept. 70
Knitting own tubes saves 10¢ a pound (CC) ... Jan. 121
Latest word in all-out automatic spinning ... Oct. 78
Rayon bonds better (FYF) ... Oct. 141
Space-dyed yarns via dope-dyeing methods ... Sept. 81
Texturized filaments (FYF) ... Feb. 113
Tow crimper (ESN) ... Oct. 210
Variations Flow Analysis for quality control see under **Quality Control**
Yarn relaxes (FYF) ... Oct. 141

Yarns, new
Buthane elastic thread for sock tops (FYF) ... Feb. 113
Elastic goes bulky (FYF) ... Oct. 141
Fiber setting at 150F possible on Turbo process (ESN) ... Aug. 116
Glass-fiber blends (FYF) ... Nov. 119
High-bulk nylon (FYF) ... Apr. 109
Kodel blended for sweaters (FYF) ... Aug. 111
New nylon is tougher (FYF) ... July 183
Nylon, no-shine (FYF) ... Feb. 113
Orlon and nylon blended for socks (FYF) ... Mar. 117
Polypropylene yarn – new use (FYF) ... Aug. 111
Summer blends (FYF) ... July 185
Tire cord, improved (FYF) ... Jan. 127
Yarn made just for carpets (FYF) ... June 125

INDEX TO COMPANIES AND MILLS

A

ABERFOYLE MANUFACTURING CO. REX MILLS DIV. – Testing yarn the modern way ... Mar. 64
ACME-McCRARY HOSIERY MILLS – Modernization ups labeling output 235% ... Jan. 82
AMERICAN CYANAMID CO. – Vat dyeing today O. W. Clark Pt 10 Feb. 98; Pt 11 ... Mar. 99
ATHENS HOSIERY MILLS – Management by the book ... June 60
AVONDALE MILLS – Updated all the way ... Jan. 67

B

BATES MANUFACTURING CO. – How to keep a New England company competitive ... Mar. 52
Multicylinder carding – how tandem carding trims costs ... Apr. 46
BAY PATH TEXTILES, INC. –Modernize or move? ... Jan. 57
BOYLE, JOHN & CO. – New plant spells new efficiency ... Sept. 85
BRENEMAN-HARTSHORN – Modernized steam plant boosts production 20% ... Jan. 78
BROOKER SPREAD CO. – Changing patterns in 10 minutes ... Dec. 65

(CC) Cost Cutters. (Ed) Editorial. (ESN) Equipment & Supply News. (FYF) Fibers, Yarns, and Fabrics.

BRUCE, ROBERT INC. – 6 sure steps to better quality control ... Apr. 62
BURLINGTON ENGINEERING SALES CO. – New pressurized becks will cut your dyeing costs ... Apr. 74

C

CABIN CRAFTS, INC. – Meeting the big push in tufting today ... May 56
CARLETON WOOLEN MILLS, INC. – Modernizing three ways ... Jan. 77
CARLTON YARN MILLS, INC. – Modernizing where it helps ... Jan. 78
Non-stop modernizing: combing paces the gains ... Nov. 60
CASPIAN MILLS, INC. – Four-feed knitting – giant step in seamless stockings ... Sept. 63
CRANSTON PRINT WORKS – New way to bleach nonstop ... Jan. 109

D

DIAMOND MILLS CORP. – Data handling: key to hosiery mill success R. B. Pressley ... Apr. 54
DREXEL (N.C.) KNITTING MILLS – Building for better production control ... Feb. 46
DU PONT DE NEMOURS, E.I. & CO. – Troubleshooting those bleaching problems R. H. Pete ... July 244
DURHAM HOSIERY MILLS–Knitting without knitters ... May 74

E

ERWIN MILLS' COOLEEMEE (NC) BLEACHERY & FINISHING WORKS–Four key points modernizing ... Jan. 102

F

FULTON COTTON MILLS – Standardizing electrical equipment – foolproof way to cut costs, slash parts inventory ... June 58

G

GAGLIARDI RESEARCH CORP. – Cotton finishing: where it stands, and what's ahead D.D. Gagliardi ... Feb. 86
GENERAL ANILINE & FILM CORP. – How you can assess nonionic surfactants C. A. Bergman ... July 270
GRANITEVILLE CO. – How to keep an old textile mill cool ... Dec. 51
GSELL TEXTILE PRINTING CO. – Doubling screen-print output ... Nov. 98

H

HAARTZ AUTO FABRIC CO. – Brand-new way to coat fabrics ... Feb. 50
HAMPSHIRE WOOLEN MILLS – Modernized picker room cuts labor cost 20% ... Jan. 83
HARMONY GROVE MILLS – When refrigeration is a 'must' in the mill ... Dec. 48
HICKORY SPINNERS, INC. – Making better picker laps ... Oct. 86
HUYCK FELT CO. – Fabric handling modernized ... Jan. 83

I

INDIAN HEAD MILLS, INC. FRANKLIN PROCESS DIV. – Building for smoother flow ... May 111
INMAN MILLS – 60 years old...and still growing ... Sept. 66

J

JEFFERSON (GA.) MILLS, INC. – How planning pays off in the years ahead ... Dec. 49
JOANNA COTTON MILLS – Foolproof way to modernize: test before you buy ... Aug. 42
JONELL CORP. – Moving up fast with burlap ... Apr. 89
JORDAN MILLS – Updating for better yarn ... Jan. 81

K

KAYSER-ROTH HOSIERY CO. – Top-notch lighting: what's it worth? ... Dec. 62
KENDALL CO. – This old multistory mill now made new – Wateree plant G.N. Guggenheim ... June 54
KERR BLEACHING & FINISHING WORKS – Bleaching at low cost R.W. Pinault ... July 234
KIMBERLY YARN MILLS – Build a new mill – or buy an old one? ... Mar. 68
KINGSBORO MILL'S DAISY (TENN.) PLANT – 3-step way to finish tricot ... Oct. 113

L

LANETT BLEACHERY & DYE WORKS–Controlling color in resin-filled goods W.F. Bigger Sr. ... June 96
LYDIA COTTON MILLS – Moving machines: key to modernizing this mill ... Jan. 72

M

MAND CARPET MILLS – New way to dye carpets open-width ... June 78
MARION MANUFACTURING CO.–4-part mill story: modernizing to keep up with today's markets ... Sept. 40
How to speed the air-conditioning payoff ... Dec. 53
McKINSEY & CO., INC. – Updating executive pay D.H. Carpenter ... Jan. 60
MELROSE HOSIERY MILLS, INC. – No-hands handling saves $40,000 per year ... Oct. 88
MONARCH MILLS – Small mills can handle starch in bulk ... Sept. 50
MORGANTON (N.C.) HOSIERY MILLS, INC. – Modern boilers make a good neighbor ... Jan. 80

N

NATIONAL ECONOMIC RESEARCH ASSOCIATES, INC. – Common Market: profit opportunity for textiles I.M. Stelzer ... May 44
New look in pricing Dr. I. M. Stelzer ... Jan. 62
NEISLER MILLS DIV., MASSACHUSETTS MOHAIR PLUSH CO. – Breaking the drying bottleneck ... Oct. 110
NITTO SPINNING CO. – Latest word in all-out automatic spinning ... Oct. 78
NORTH AMERICAN MILLS, INC. – Modernizing and growing – at the same time ... Jan. 84
NORTH CAROLINA FINISHING CO. – Versatility achieved R.W. Pinault ... July 230

O

OLD SLATER MILL – Where history comes alive ... Feb. 65
O-M LTD. –Latest word in all out automatic spinning ... Oct. 78

P

PEAT, MARWICK, MITCHELL & CO. – Improving profits with better waste control Peter John King ... June 64
PROXIMITY PRINT WORKS, FINISHING DIV. OF CONE MILLS – No silica build-up R.W. Pinault ... July 234

R

RIEGEL TEXTILE CORP. – Giant step in loom cleaning ... Feb. 54
ROCK HILL PRINTING & FINISHING CO. – New strapper means less labor, better handling ... Jan. 82
ROCKFORD MFG. CO. – Multicylinder carding – how DuoCards boost quality ... Apr. 44
ROXBURY SOUTHERN MILLS, INC. – What keeps a top-notch carpet company at the top? ... Nov. 48
RUSSELL MFG. CO. – Better fabrics bleached R.W. Pinault ... July 228
First report on new comber changeover ... Jan. 79

S

SHANNON LIMITED, INC. – How a small double-knit mill got into production – fast ... Oct. 83
SOUTH CAROLINA STATE PORTS AUTHORITY– Smooth way to handle fabric ... Mar. 60
SOUTHERN REGIONAL RESEARCH LABORATORY – Where ringless spinning stands today Kyame & Copeland ... May 70
THE SPRINGS COTTON MILLS, INC. – Trucking yarn on the ceiling ... Dec. 59
STANDARD-COOSA-THATCHER – Old company with a brand-new range R.W. Pinault ... July 232
STAR FINISHING CO. – Dyeing big tufted carpets ... Oct. 106
SYNTHETICS FINISHING CO. – Handling cuts finishing costs ... Jan. 79

T

TEXSTYLE CREATORS INC. – Unmechanized printer stays competitive ... Aug. 70

V

VAN RAALTE CO. – Brand-new way to control your warp beam let-off ... Aug. 50
VERTIPILE, INC. – Giving fabrics a new look ... June 87

W

WERNER MANAGEMENT CONSULTANTS INC. – You and the Common Market R.M. Ashner ... Aug. 28
WESTINGHOUSE ELECTRIC CORP. – Tips on maintaining your range drives J.G. Stephenson ... Aug. 46
WHITTAKER, FRED CO. – Know-how + the right site = success ... May 108
